

eRA Solutions that  
**Work** the way you **Do**

---

Accelerate your research potential with MÖDERAS, leading you forward.

## Effective Technologies For Business Success

MÖDERAS specializes in web-based electronic research administration (eRA) solutions developed on the open source Quali Coeus™ (KC) platform.

We strive to develop a comprehensive system that will afford our clients the ability to obtain solutions that meet all of their research administration needs. Our vision is to provide a fully modular, end-to-end solution that has all the work flow, integration, and document management usability features needed to become the system of choice; one that doesn't sacrifice functionality to be cost effective.

We believe that by continuously collaborating and evaluating the growing needs of the industry, we can help make your life easier by saving you time and hassle, enabling you to get the job done.

“ Working with MÖDERAS on a large implementation project, has been a wonderful experience. They are attentive, responsive, professional, and caring. I am always aware that they are listening to our needs and consistently striving to achieve an optimal outcome for us. ”

*R. FRANCIS, UNIVERSITY OF TOLEDO*

# Next-generation eRA services and products

## IMPLEMENTATION

MÖDERAS utilizes a "rapid application development" methodology in our implementation process. This unique approach of engaging your staff in short bursts of effort will limit the burden on your team, speed up the process of delivery and ensure the best possible end results. MÖDERAS understands that our success is dependent on your success; we focus on providing solutions that meet and exceed your needs by applying our unparalleled experience. Let us help you navigate the process of integrating Quali Coeus into your office by creating solutions that work the way you do.

## TRAINING

MÖDERAS has a multitude of means to get you the training you need. Partake in our specialized boot camps, our one-on-one training seminars, online webinars, or simply download our free white papers. Whether it's to help you learn critical skills, develop better processes, or to enhance your knowledge and expertise, MÖDERAS can provide you with the training you need to be successful in all that you do.

## SUPPORT

The MÖDERAS team consists of research administrators, project managers, business analysts, database administrators, and developers all with strong backgrounds in research administration. This blend of skills puts us in the ideal position to drive your success by answering questions, solving issues, and assisting in troubleshooting any gaps that may occur. We support you in adopting Quali Coeus as a complete eRA solution from standard system configuration to customizations. We offer on-going support through various channels such as phone, internet, chat, and email to ensure your success. We are here when you are up against a submission deadline to help make sure your proposal is submitted on time.

## HOSTING

Drive down your total cost of ownership while simultaneously achieving more control, by hosting your eRA solution with MÖDERAS. The advantages of hosting your eRA solution include dedicated personnel to manage your system and apply necessary upgrades and patches, hardware, software with sustainability up time guarantees, and system redundancy with disaster recovery as desired. Hosting also allows your users to effortlessly access your eRA solutions from any browser anywhere in the world.

## POST AWARD TRACKING

In a recent study by the Federal Demonstration Partnership on faculty administrative burden the number one reported issue was managing budget-to-actual expenses. MÖDERAS Post Award Tracking takes the hassle out of this process by integrating Kualo Coeus awards and budgets with your expenditures. Principal Investigators and Project Directors will have a dashboard to easily access their awards and quickly see the status of all their projects. Burn rates will be displayed along with projected ending balances in relation to the time remaining to provide earned value management information at your fingertips. Drill into years, periods, months, categories of expense and the expense records themselves to get a handle on every detail related to the financials of your project. Make modifications to budgeted items to bring the burn rate back into compliance, and save a new version or keep as a scenario to deal with the possibilities such as federal sequestrations. MÖDERAS, eliminating the burden of managing your budget-to-actual expense.

## DATA DMZ

Using the systems you have in place is a key component to our success. The Data DMZ is a platform for transferring your legacy and current HR and Financial data into your eRA solution. The Data DMZ can accept data from any system, automating the process of accepting data and applying your custom rules before making it available to end-users. Long gone are the days where you have to manually re-enter information from one system into another.

## KWEST

Kwest is a best in breed application for searching both public and private funding opportunities. The difference between Kwest and all the other currently available tools is our algorithm that provides meaningfully scored results saving your staff countless hours digging through possible matches. Kwest features an easy to use and friendly interface with the ability to create custom searches that can be used to query the opportunities automatically. You can also setup up custom alerts to get the search results you want how and when you want them. Integrate Kwest with Kualo Coeus to allow a one-click creation of a proposal from your search results, eliminating the possibility of typos and speeding the process of proposal creation.

## INSIGHT

Having all your research data in one place is great for productivity, but the real value is in being able to make decisions based on that data. MÖDERAS provides you the best of both worlds with our InSight business analytics tool. Our easy to use wizards allow even the most technologically adverse staff to create robust reports in just minutes. More advanced users can create highly formatted enterprise reports, interactive dashboards, and schedule reports to run on a regular basis for automated distribution via email. Imagine the ability to quickly and easily search your data, to drill down from the university to college to department and then slice across that data by sponsor and then again by sponsor and year! Imagine no more, this market leading reporting system, InSight, offers you solutions today.
